I do have one question – and it relates to clinical trial registration information because at one point in time we were registering trials in CTGOV. We occasionally get questions about why something was registered when it was. We might need to let CCCT know that we plan to remove those trials.

Sounds good to me as well.

Hi Amy,

It is fine with me. A lot of history going into that big cyber graveyard in the sky…

Thanks,
Margaret

Subject: RE: CDR Streamline - document removal

Good afternoon,

I wanted to follow up to see if there were any questions on this planned aspect of the CDR Streamline – removing the documents noted in the email below. Though I have had conversations with Lakshmi and Margaret separately about the planned document removal, I wanted to make sure we have approval of the requirement update before we move forward on the CDR upper tiers.

Thanks,
Amy

Subject: CDR Streamline - document removal

Hi Lakshmi and Margaret,

When the CDR was developed, a key business rule that was put into place to govern the CDR was that all documents in the CDR should be kept indefinitely. A number of requirements for the CDR have evolved over the years. A primary example is the update to the data source for the Cancer.gov Clinical Trial Search from Clinical Trials Protocol documents in the CDR to the Clinical Trials API that draws from the CTRP database. In order to continue to streamline the CDR, improve its maintainability, and set up for a potential next generation CDR replacement, the CDR team analyzed documents that are no longer in use and do not have any dependencies with other documents, database tables, or processes in the CDR. The following list was developed, and the removal of these documents was tested out successfully on the CDR Dev tier.

- All InScopeProtocol documents
- All CTGovProtocol documents
- All ScientificProtocolInfo documents
- All OutOfScopeProtocol documents
- All GENETICSPROFESSIONAL documents (from before we used Person docs for these)
- All GlossaryTerm documents (superceded by GlossaryTermConcept and GlossaryTermName docs)
- All css documents (we no longer use the database to store the style sheets for XMetaL)
- Person documents other than GPs and board members
- Organization documents other than PDQ boards and orgs linked directly by Person docs we're keeping

- Mailer documents except for summary and GP mailers

Additional detail on the updates can be found here: https://tracker.nci.nih.gov/browse/OCECDR-4478.

I wanted to send this follow up email to summarize in-person conversations I have had separately with each of you to verify you are both on the same page to move forward with the CDR Steamline (purge of the documents above) from the CDR upper tiers, to include production.

Please respond at your convenience to indicate it is ok to proceed.

Thanks,
Amy
